

Phosphate Exploration Sites in North Central, Florida

to the Core.
Integrity

**PCS Phosphates
White Springs, FL**

**Contract Value:
\$293,000**

**Start Date:
June 2008**

**End Date:
November 2008**

**Project Reference:
PCS Phosphates
Ann Lessman
(386) 397-8108**

MDC mobilized a truck mounted sonic rig for the purpose of drilling and sampling approximately four-hundred (400) soil borings to depths 15 to 100-ft with an average depth of approximately 45-ft.

Each borehole location was advanced using 4-inch x 6-inch sonic methods and 1/3 of the boring footage were sampled. The samples were obtained in 10-ft runs with each sample split into 5-ft samples and placed in plastic liners for the PCS site representative. After all sampling activities completed, the boreholes were backfilled with cuttings and bentonite holeplug. The site was restored to a “clean” condition.
